State Radio Communications System for the 21st Century

StarCom21

StarCom21 is a Statewide 700/800 MHz. APCO-25 digital trunked system owned and operated by Motorola on behalf of the State of Illinois and other customers. This Profile details the frequencies, talkgroups and other information needed by scanner listeners. While some information has been provided from official sources this document is created by and for the scanner hobbyist and not intended as a substitute for official documentation.

The system is designed to be used by a variety of users, including State, County and local agencies as well as approved Critical Infrastructure providers. Different pricing plans are available for agencies that need local, areawide or statewide communications. In addition pricing can vary if the customer has resources to share, such as tower sites or frequency allocations.
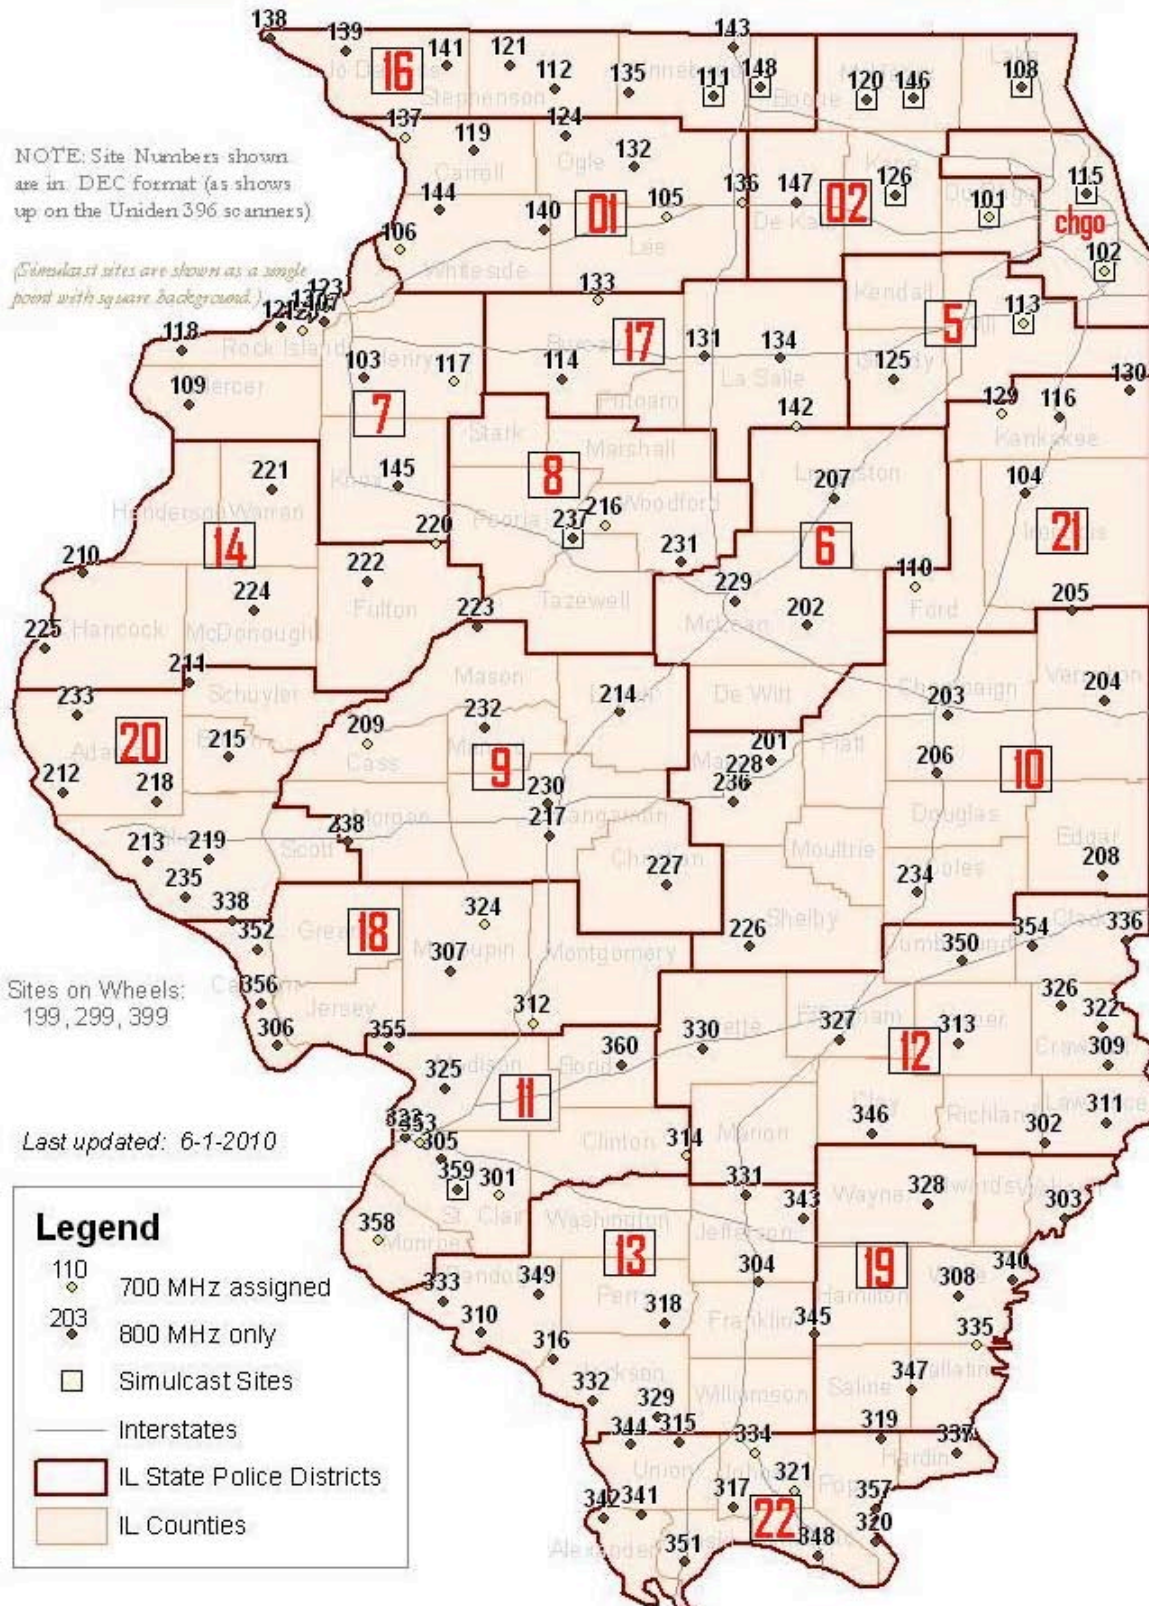

Scanners will show a System ID of 140 and a WACN of BEE00.
This document is intended for hobbyist use only.

Zones:	The system is broken down into 3 Zones, North (Zone 1, Sites 1xx), Central (Zone 2, Sites 2xx) and South (Zone 3, Sites 3xx). When a scanner listener monitors the system using a compatible scanner they will see Site Numbers displayed when monitoring a control channel. By using the following lists scannists can determine the location of the tower they are monitoring. Zone 3 may be split by adding Zone 4 to it. Zone 5 is Cook County.
Simulcast:	Simulcast towers are used in the Peoria, Rockford/Belvidere and Chicago Metro areas as well as on the St. Clair County system. Each Simulcast group shares a common tower ID among its member locations. The exact frequency and talkgroup information is broadcast over each on the towers in that simulcast group.
700 MHz. changes	Changes in the 700 MHz. bandplan may result in some 700 MHz. channels being reassigned. This may affect scanner users as the newly assigned channels may not be present in some radios.
866-869 MHz. Rebanding	Rebanding of all StarCom21 800 MHz. sites has been completed. All sites and radios had to be reprogrammed to accommodate the Sprint/Nextel realignment. Occasional data quirks may cause programs like Pro96Com to report unused frequencies.
Dynamics:	The system is continuously being tweaked and changes in tower locations, frequencies and talkgroups used are made often. RadioReference and CARMA are cooperating by sharing information on this dynamic system as well as others, so expect to see contributions to one appear on the other. As StarCom21 grows and matures additional sites are added or existing sites changed. New sites are planned in the Addieville (Washington County) area as well as in DuPage County. More new sites could still be added.
Site Numbers:	Site Numbers listed are in Decimal, as shown on Uniden's BCD396T, BCD396XT and BCD996T scanners and in Hex, as used by Radio Shack and GRE scanners. Pro96 and Pro2096 scanners display these numbers in a modified Hex format. The GRE PSR-500 and PSR-600 scanners display the "Region" (1, 2, 3 or 5 on StarCom21 sites) and then the 2 digit Hex site number. This Region number corresponds with the Zone numbers used here. System users with XTS or XTL radios can press the Site button on the radio to see the site your radio is affiliated with minus the Zone number.
Site Locations:	Sites are listed with the nearest city or postal name, the county the tower is located in as well as the tower owner or lesser, Please be advised that the system is always in a state of flux and these sites can and will change. The city listed may not actually be in the listed county, the county noted is the actual location of the tower, which may be near the noted community but in the next county.
Coordinates:	The approximate GPS coordinates for each of the tower sites are listed below. These are helpful for owners of the Uniden BCD996T, 396XT and 996XT scanners, as these radios are capable of using GPS coordinates to automatically turn on and off sites as the user arrives in an area. For users of ARC996 and ARC-XT programming software these coordinates are already included in the programming files available at http://www.carmachicago.com/profiles.
Channels:	We have decided to include all channels used on the system, voice and control. This was done after several sites changed control channels to what had previously only been noted as Voice channels. Known Control Channels or Alternate Control Channels are shown in bold. Other channels listed may also be used as Control channels, as these are found they will be noted here. All scanners that are capable of monitoring StarCom21 use "Control Channel Only" trunking, so only the currently active Control Channel need be programmed. It is suggested however that users program all channels to their radios in case a different channel becomes a control channel.

Chicago Area Radio Monitoring Association (CARMA)

Illinois State Police:	The StarCom21 system was designed around the needs of the Illinois State Police, the primary user of the system. The ISP has converted all operations to StarCom21 as of September 2007 and has abandoned use of the old VHF Lowband system (42 MHz.) Some VHF Highband (150 MHz.) channels remain in use as back-up to StarCom21.
Expansion:	Other systems have expressed interest in either joining StarCom21 or linking in as Zones or Sites. The following locations have considered StarCom21 or applied for grants to use StarCom21: DuPage, LaSalle, Marion, Bond, Clay, Effingham, Fayette, Jasper, Grundy, Clinton, Stephenson, Knox Counties, and Northwest Central Dispatch. Other areas have already switched to the system, in whole or part, including Boone County/ City of Belvidere, McLean County (with Bloomington and Normal), Lee County, Macon County, Winnebago County/Rockford, City of Decatur, City of Romeoville, and Springfield/Sangamon County.
Site 359 (St. Clair County)	Site 359 is the St. Clair County Simulcast system, owned and operated by the St. Clair County ETSB. While interconnected and sharing site and subscriber information with the StarCom21 system, this is actually not part of it. Sites 359B and 359D are shared with StarCom21 sites 305 and 301 respectively.
Champaign County:	Champaign County has an independent APCO25 trunked system called MDICE using the same technology as StarCom21 and has coordinated talkgroups and Radio ID's, it could become a Site or Zone fairly easily. MDICE radios already have StarCom21 Mutual Aid talkgroups in them. System ID used on MDICE is 1DA.
Sites 120/146 (McHenry County):	Site 120 (McHenry County Simulcast) locations were originally set up just for Starcom21. In mid 2007 McHenry County licensed channels at each site. These sites carry both StarCom21 and McHenry County transmissions on different sets of frequencies. The McHenry County freqs use Site 146, the StarCom21 freqs use Site 120. This has been set up in a similar fashion to St. Clair County, with McHenry owning the system and sharing subscriber information with StarCom21. This would allow interoperability between the systems. Site 120G/146G and 126C are the same location.
Cook County	The former "761B" Motorola SmartZone system used by Cook County became a new node (5) for StarCom21 in 2011. Site numbers, talkgroup ID's and radio ID's are all coordinated with StarCom21 and roaming will be allowed for some or all radios. All Cook County operations (TGID's in the 25000 series are encrypted.
ILEAS:	ILEAS, a statewide mutual aid system, has distributed StarCom21 radios to most police and fire agencies in Illinois for use in wide area emergencies and preparation. Some agencies have installed these in 9-1-1 centers, others in Command vehicles, others have them held in reserve. Similar programs have seen StarCom21 radios installed in hospital emergency rooms as well as colleges and universities.
Other State Agencies:	Some other State agencies have converted all or most operations to StarCom21, most that have switched rely on the ISP for radio services. The Illinois Tollway Authority has extensive operations on StarCom21. The Secretary of State and Department of Natural Resources also use the system. The Department of Corrections has only limited use of the system but it is believed that they will eventually convert more operations to the system as resources allow. IDOT also has assignments on StarCom21.
Ameren:	In 2008 agreement was reached with Ameren, the downstate utility company, to share radio resources such as tower sites, frequencies and interconnection infrastructure. This will result in some Ameren licensed frequencies appearing in StarCom21 use and Ameren talkgroup assignments on the system. Since utilities are not allowed to use 700 MHz. sites at this time, some sites have had 800 MHz. frequencies added to them.
Mobile Sites	Several SOW's (Sites on Wheels) have been established and are deployed around the state. These SOWs are programmed as Sites 199, 299 and 399, one for each Zone. These are fully contained sites that can be rolled out to replace a damaged site or allow event communications. They are HQ'd in Joliet, Springfield and Collinsville.
Compatible Scanners	These radios will work on all StarCom21 sites: *Uniden* BCD396T, BCD396XT, BCD996T, BCD996XT and the HP-1. *GRE* PSR500, PSR600, PSR800. *Radio Shack* Pro-106, Pro197. Other digital scanners may work on 800 MHz. sites only, such as the Uniden BC296D and BC796D as well as the Radio Shack Pro96 and Pro2096.
Street Atlas and Programming Files:	Users of DeLorme's StreetAtlas products may download the StarCom21 map data at: <div align=center>http://www.carmachicago.com/profiles</div> This will show the tower locations statewide notated on the map. Also available at this site are programming files for both UASD and ARC996/ARC-XT that include all sites and GPS coordinates.
More Information:	Please see these sites for additional and more up-to-date information: <div align=center>http://www.radioreference.com/modules.php?name=RR&sid=2324 (Radio Reference StarCom21 database)</div> <div align=center>http://groups.yahoo.com/group/STARCOM21 (Starcom21 Special Interest Group)</div> <div align=center>http://tinyurl.com/ma4f2z Google Map showing StarCom21 Sites</div>
	**CARMA wishes to thank several people and organizations for helping with this resource. Some wish to remain nameless, others include Tom Laue, Terry Weatherford, and Rich Carlson as well as the many members of RadioReference.com and CARMA who have helped!**

DATA SOURCE: Starcom21 CARMA Profile <http://www.carmachicago.com/profiles/StarCom21.pdf>

All frequencies are listed in *Italics* until confirmed by users.
The letter on Decimal Site Numbers is used to identify Simulcast Sites and is not reported by the system.
Site Numbers in Decimal format are for Uniden scanners.
(Hex) Site numbers are as shown on GRE & Radio Shack scanners and some software packages.

Champaign County METCAD Digital Inter-operational Communications Environment (MDICE)

MDICE uses the same APCO-25 digital technology as StarCom21 but is it's own un-connected system. Since the technology is the same the radios can have both systems installed. MDICE units have the various StarCom21 Mutual Aid talkgroups in them. The talkgroups assigned to MDICE are coordinated with those of StarCom21 to avoid duplication. MDICE uses System ID of 1DA. The Talkgroups are listed in the Master Talkgroups List.

Zone 3 Notes: Site 359 is owned and operated by St. Clair County. While some of the tower locations are shared with StarCom21 sites, only St. Clair County and the various Interoperability Talkgroups work on the 359 sites.

Cook County (Zone 5):
Cook County has converted their older Motorola Type II trunked system into a StarCom21 compatible system set up as Zone 5.

Chicago Area Radio Monitoring Association (CARMA)

Illinois State Police StarCom21 Talkgroups:

Each ISP District has Dispatch A & B, Detail A & B, IREACH, ISPERN and Local Patches, as well as Car to Car, Investigations and MVR channels assigned. Some districts also have Disp C and Detail C channels. District Chicago will have Dispatch A thru G channels in addition to the others.

Districts are assigned discreet 700 or 800 MHz. frequencies for Mobile Vehicular Repeaters (MVR) to allow access to the mobile StarCom21 radio from the trooper's portable radio.

Each District has their own radio layout, but will have the main Zone set up for the following plan:

ISPERN	(Patch)
Dispatch	(A, B & C as applicable)
Car to Car	
Detail	(A, B & C as applicable)
Vehicular Repeaters	(Portables only)

The Second Zone will have IREACH and other patches, including EMS, Fire and Federal, as well as Tollway Ops (in Districts 1, 2, Chicago, 5, 7, 16, 17). Other Zones on radios will have such talkgroups as Special Events, Critical Incidents, Academy, Auxiliary, Mutual Aid, ITTF, various Tac channels and other District Dispatch and ISPERN groups.

Table 4:   ISP Dispatch & Detail Assignments:

Notes:

►	Only some districts have Dispatch or Detail "C" talkgroups. Only Chicago has D thru H talkgroups.
►	Other District Chicago and District 15 talkgroup assignments are listed separately.
►	If a District does not have an assigned Talkgroup for that column it is filled with an "x".
►	9000 Series talkgroups are Zone 1 (North)
	13000 Series talkgroups are Zone 2 (Middle)
	17000 Series talkgroups are Zone 3 (South)

Table 7:   *Other Talkgroup assignments:*
Zones 1, 2 and 3 refer to the StarCom Zones as indicated on the Site List.
Zone 1 is basically north of I-80, (Districts 1, 2, Chicago, 5, 7, 16, 17, 21)
Zone 2 is mostly in-between I-80 and I-70 (Districts 6, 8, 9, 10, 14, 20)
Zone 3 is mostly south of IL-16 (Districts 11, 12, 13, 18, 19, 22)

StarCom21 Radio ID's: | Users of some scanners and software have the ability to display radio ID's, these can be useful to
help determine use of a talkgroup. | Here are some general ranges of ID's identified by scannists. This is not an exact list, as radios can
be swapped around at will.

ID	Description	ID	Description	ID	Description
1xxyy	ISTHA	350xxx	IL Dept. of Corrections (N)	769xxx	IDoT (S)

Starcom21 Master Talkgroups List:

Below is a list by number of all known, extrapolated and monitored Talkgroups. These were contributed by users of scanners, software monitoring programs or system users. TG's with no annotation were logged by Pro96Com or Unitrunker users. This list is set up to allow "cut and paste" into various scanner programming applications.

Chicago Area Radio Monitoring Association (CARMA)

Tactical and non-trunked frequencies:

Several frequencies have been assigned to StarCom21 radios. These are installed in both repeater (+30 MHz. offset) and direct modes, and all are P25 digital.

Frequency	Name	Frequency	Name	Frequency	Name
764.14375	TAC58	765.64375	TAC70	775.00625	LAW84
764.24375	CAL59	765.89375	MOB72	775.10625	TAC82
764.64375	TAC62	765.99375	TAC73	775.25625	TAC83
764.73750	TAC63	774.10625	TAC74	775.35625	LAW85
765.14375	TAC66	774.25625	CAL75	775.50625	MOB88
765.24375	TAC67	774.60625	TAC78	775.60625	TAC86
765.39375	TAC68	774.75625	TAC79	775.85625	TAC89
765.49375	TAC69				

ITAC frequencies: (All PL 156.7)

ITAC Frequencies are in most StarCom21 radios and many contain both the original ITAC channels and re-banded channels until the rebanding project is completed. ITAC repeaters are located throughout the state and may be used by any Public Safety agency or unit.

851.0125 - 8CAL90R (repeat) and 8CAL90D (direct)	ICALL RN (repeat) and ICALL DN (direct)
851.5125 - 8TAC91R (repeat) and 8TAC91D (direct)	ITAC1 RN (repeat) and ITAC1 DN (direct)
852.0125 - 8TAC92R (repeat) and 8TAC92D (direct)	ITAC2 RN (repeat) and ITAC2 DN (direct)
852.5125 - 8TAC93R (repeat) and 8TAC93D (direct)	ITAC3 RN (repeat) and ITAC3 DN (direct)
853.0125 - 8TAC94R (repeat) and 8TAC94D (direct)	ITAC4 RN (repeat) and ITAC4 DN (direct)

Change Log:

Date	Initials	Items/Page Nr of changed items:
11-17-11	rc	Edited unit numbers and Cook County info.
01-03-12	rc	Updated many TGID's and Site 101
01-14-12	rc	Updated more TGID's and Site 101
03-01-12	rc	Site 361
09-02-12	rc	Multiple Updates to TG, Zone 3 Sites
